

**UNIVERSITY OF
MARYLAND**

Department of Fire Protection Engineering

Code-Based Approach to Fire Safety Design

A. JAMES CLARK SCHOOL of ENGINEERING • UNIVERSITY of MARYLAND

Code Approach

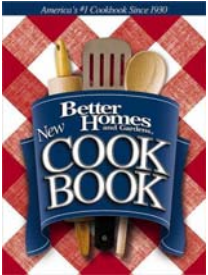

- Code overview
 - What are Codes?
 - How are Codes developed?
- Applications
- Examples

What are codes?

- Establishes criteria for construction
- Prescriptive historically
- Broad classification of buildings
- Performance-based recently

How are codes developed?

- Group of People
- Varied interests
 - Enforcers
 - Special experts
 - Manufacturer
 - User
- Anyone input
- Acceptance by vote
- Participation in vote may be limited

Types of Codes

- Life Safety
- Building Design
- System Design
 - Guidance
- Prescriptive
 - Specific applications

Code and Standard Guidance

- NFPA Codes:
 - NFPA 101 – *Life Safety Code*
 - NFPA 13 – *Standard for the Installation of Sprinkler Systems*
 - NFPA 72 – *National Fire Alarm and Signaling Code*
- ICC Codes:
 - International Building Code (IBC)

Code Guidance

- Goal: To provide an environment for occupants that is reasonably safe from fire.
 - Occupants not intimate
 - Survivability for intimate

Code Guidance

- Applicability
 - Base code for a jurisdiction
 - Jurisdictional amendments

Code Approach

- Determine use
- Determine number of people
- Determine hazard
- Apply criteria

Code Guidance

- Occupancy Classifications

Code Guidance

- General Building Construction Types
 - Heights and Areas
 - Occupancy group

GROUP	HEIGHT (Feet)	TYPE OF CONSTRUCTION											
		TYPE I			TYPE II			TYPE III			TYPE IV		
		A	B	C	A	B	C	A	B	C	A	B	C
A-1	15	15	15	15	15	15	15	15	15	15	15	15	15

Code Guidance

- Means of Egress
 - Number
 - Capacity
 - Arrangement
 - Discharge

Code Guidance

- Fire Protection Features

Code Guidance

- Building Service and Fire Protection Equipment
 - Utilities
 - HVAC
 - Smoke Control
 - Detection and Alarm
 - Sprinkler Systems

Code Guidance

- Fire Protection Systems
 - Gives requirements based on occupancy use and other special conditions

**Code Guidance**

- Special Structures and High-Rise Buildings

**Code Guidance**

- Special Requirements Based on Use and Occupancy

**Code Guidance**

- Interior Finishes

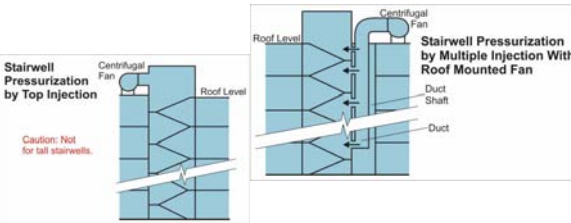

Example Code Requirements

- Automatic sprinkler system and secondary water supply
- Automatic smoke detection
- Emergency voice/alarm
- Standby and emergency power
- Smokeproof exit enclosures
- Fire command center

Example Code Requirements

- Smokeproof exit enclosures
 - Open exterior balcony or ventilated vestibule
 - Or, pressurize stairwells

Caution: Not for tall stairwells.

Other Codes

- International
- DOD: *UFC 3-600-01 Design: Fire Protection Engineering for Facilities*
- GSA: *Facilities Standards for the Public Buildings Service, P100*
- VA: *Design Manual: Fire Protection*

Code Approach Summary

- Code provide guidance based on use of building
- Application to almost all buildings everywhere
- Codes and standards
 - Life safety and property protection
 - Exist to regulate and guide
